

Habitats and Vegetation Timetable

N.B. These timings are for general guidance and not for specific site assessment

	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
SURVEY	Phase 1 (sub-optimal)			Phase 1 and NVC Certain types of habitats require different survey timescales, particularly for detailed botanical surveys. For example, the optimal survey time for woodland is between mid-April to late June. Consult qualified ecologist for more details.					Phase 1 (sub-optimal)			
MITIGATION	Prior consultation with qualified ecologist required											

	Optimal survey period
	Sub-optimal survey period
	Consult qualified ecologist
